

Zeagle Product Specifications

Zeagle Regulators

Octo-Z
320-7200YL (pictured)
Also available in black

Octo-Z Combination Regulator/Inflator

Octo-Z Features

Features include:

High flow QD connections for air supply

Corrugated hose disconnect (So Octo-Z can easily be stored with regulator.)

Corrugated hose rinse connection. (Allows a garden hose to be connected to the BC for easy effective rinsing.)

Light but rugged design

Balanced inflation valve, for easy use and precise BC fill-rate control. (The BC can be orally inflated through the Octo-Z's mouthpiece.)

Both QD and corrugated hose fittings rotate (even under pressure) for easy, comfortable placement of the Octo-Z's body.

Ergonomic placement and contrasting colors make the Inflate and Deflate buttons easy to find, distinguish and operate.

Weighs .95 pounds

BC being flushed out using the standard garden hose connector
