### The Tech BC— A Heavy-Duty System That Can Do it All

**The Tech BC is at home in Recreational diving or in challenging environments like wreck diving or Tech diving.**

Constructed of heavily reinforced 1050 denier ballistic nylon, the Tech BC is comfortable, balanced, and secure. The Tech has a twin buckle front closure rather than a cummerbund, many divers feel the buckles are quicker to adjust when using heavy gear and thick suits. The Tech BC comes standard with a 65-LB lift bladder for supporting heavier gear, larger divers, or twin cylinders. Standard 11" Grommets allow the mounting of twin cylinders via standard or mini backplates, eight Stainless Steel D-rings and two zippered utility pockets provide plenty of options for carrying gear.

Zeagle's modular construction allows the Tech to transition between many different types of diving, single or twin cylinders, and recreational or technical, or professional diving environments. Optional bladder assemblies having as much as two 85-LB lift air cells can be easily mounted.

The Tech is very popular among divers who want a rugged buoyancy system that can take on the most challenging environments.

Color: Black only
