

Zeagle Product Specifications

Buoyancy Compensators:

Eden BC
7902VK

The Eden is cut, shaped and sized for the female form. It features a vest that is scooped in the lower rear to accommodate shorter torsos and wider hips. It is a rugged full featured but light weight BC, designed for women who may do both warm and temperate water diving. The Eden's extra durable reinforced 1000 denier nylon bladder material gives an extra level of protection against abrasion or punctures in close environments like the edge of a coral reef or wreck. It has sufficient lift and weight capacity for most average sized divers to use in their local environments, yet packs easily into a lightweight travel system.

The Eden's bladder is constructed of light weight heavy duty 1000 denier nylon. It also features Delrin D-rings and Zeagle's great sizing.

The Eden is ideal for the woman who wants a lightweight but rugged system, for both travel and local diving that doesn't compromise on features.

Eden Standard Features *
